

MAP 4CI – CLA with business focus on statistics

Possible Assignment Ideas

1. *Homework center for grades 9, 10* - can be found by determining that younger grades spend more time on homework.
2. *Video game room* – can be found by determining that students are more interested in going to school when they are allowed to play games.
3. *Spirit wear store* – can be found by determining that students will spend money on spirit wear if it is available to them and they do not have to wear their uniform and would increase their spending if that was available.
4. *Sporting goods store* – can be found by determining that students are interested in having the latest sporting technology and would increase their spending if that was available.
5. *Baked goods* - can be found by determining what students will spend their money on.
6. *Nap room* – can be found by determining the amount of sleep students want as they get older.
7. *Juice stand* – can be found by determining when students get thirsty and what area of the school would be interested.
8. *Study notes* – can be found by determining if there is an interest in students having their notebooks organized and willing to pay to get them that way.
9. *Car wash* – can be found by looking at how many students drive to school and work.
10. *Locker decals* – can be found by determining if students are interested in their identity.
