

# ENERGY CONSERVATION AND YOU!

The people at *Every Kilowatt Counts* have asked you to create a pamphlet that they can use to inform the people in your neighbourhood and community about methods to conserve energy in their homes and reduce their impact on the environment. They would like you to use these guidelines to make the pamphlet:

## Page #1 – Title Page

Create a cover page that includes pictures about energy conservation. It should also have your name, your school's name, and a big picture.

## Page #2 – *Energy Conservation*

Describe why it is important for everybody to change their lifestyles to conserve energy and describe how human activities impact the environment.

## Page #3 – *Household Appliances*

Describe how to buy energy efficient appliances for your home. This includes describing how to read an Energyguide label. Provide proof that up-dating to energy efficient appliances would save you money.

## Page #4 – *Smart Meters*

Describe how smart meters work and how you can save money by use electricity at only certain times during the day.

## Page #5 – *How to Conserve Energy*

Describe things people can do around their homes to reduce the rate that they use energy and decrease their impact on the environment.

## Page #6 – *Community Programs*

Describe some community programs that are related to conserving energy and reducing human impacts on the environment. Here are some sites that might help you

- Power Pledge - <http://www.powerpledge.ca/>
- Every Kilowatt Counts - <http://everykilowattcounts.ca/>
- PowerWISE - <http://www.powerwise.ca/>

**RETHINK, REPLACE, REDUCE**

"Tonight, an in-depth look at what each of us can do to help conserve electricity."
